

**DEFINICIONES DESAGREGACION OPERACIONES BRS\*:**

**BRS-0:** Saldo resultante de las desviaciones entre el gas efectivamente emitido por los transportistas y las consignas de operación del GTS.

267,6

**BRS-1:** Saldo que resulte de las operaciones previstas, programadas por el Gestor técnico del sistema que responderán a alguno de los siguientes tipos:

1. Las necesarias para respetar los derechos de almacenamiento de los usuarios conforme al apartado 2.4.2 "Almacenamiento para la Operación Comercial en la Red de Gasoductos de Transporte".
2. Las necesarias para el transporte del gas talón-colchón de las instalaciones.
3. Operaciones programadas por el GTS para que la actividad de los transportistas tenga el menor efecto posible en las nominaciones.
4. Las operaciones necesarias para lograr una ubicación adecuada de las mermas de transporte, o el exceso de las mismas, en cada una de las instalaciones de acuerdo con lo establecido en la Disposición adicional quinta de la Orden ITC/3863/2007 de 28 de Diciembre.
5. Otras operaciones programadas por el GTS en la aplicación de la normativa en vigor

**BRS-2:** Será el saldo que resulte de las diferencias entre las consignas de operación que realice el GTS para alguno de los puntos de entrada y las cantidades asignadas a los usuarios y al GTS.

***\*Definiciones recogidas en el Protocolo de Detalle de las Normas de Gestión Técnica del Sistema PD-11 "Procedimiento de reparto en puntos de entrada a la red de transporte"***
